

MATTHEW VONROY MAGOMBO

COMPUTER SYSTEMS ENGINEER | SOFTWARE | CYBERSECURITY | CLOUD

Harare, Zimbabwe • +263 774 317 104 • mvmagombo@gmail.com • github.com/VonMagombo • linkedin.com/in/matthew-v-magombo

PROFESSIONAL PROFILE

Computer Systems Engineering graduate with Upper Second Class Honours and hands-on experience in enterprise IT support, software development and cybersecurity. Strong foundation in Python, C++, JavaScript, SQL, Linux, Git, REST APIs and networking, with growing expertise in cloud and DevOps. Experienced in troubleshooting enterprise systems, supporting users, documenting technical issues and translating complex technical concepts into practical solutions.

CORE COMPETENCIES

Software Engineering Python • C++ • JavaScript • SQL • OOP • REST APIs • Debugging • Testing	Cloud & DevOps Oracle Cloud Infrastructure • Kubernetes • Linux • Git/GitHub • CI/CD concepts • CLI
Cybersecurity SIEM concepts • Network security • Packet analysis • IDS fundamentals • Security monitoring	IT Infrastructure Windows/Linux administration • TCP/IP • Hardware/software troubleshooting • System support
Data & Problem Solving Data interpretation • Basic analysis • Reporting • Logical reasoning	Professional Communication • Documentation • Teamwork • Adaptability • Time management

PROFESSIONAL EXPERIENCE

IT Intern | Central Vehicle Registry – Harare Oct 2023 – Aug 2024

- Provided technical support for enterprise vehicle registration systems, helping maintain system availability and operational continuity.
- Diagnosed and resolved software, hardware and network issues in a high-demand government IT environment.
- Collaborated with senior engineers to analyse system faults and support performance improvements.
- Maintained technical documentation, incident logs and system support procedures.
- Supported end-users across departments, improving response efficiency and service delivery.

Computer Science Tutor | Opening Horizons Academy Jan 2023 – May 2023

- Delivered instruction in programming, databases, algorithms, computer systems and networking.
- Guided students through practical coding exercises and software development fundamentals.
- Designed structured learning materials and mentored students on ICT projects.

EDUCATION

Bachelor of Computer Systems Engineering (Honours) | Midlands State University 2025
Upper Second Class (2.1)

CERTIFICATIONS

- Google Cybersecurity Professional Certificate
- ALX Cybersecurity Certification
- Linux Foundation Kubernetes & Cloud Native Essentials (LFS250)
- Microsoft GitHub Copilot Certification
- Oracle Cloud Infrastructure 2025 AI Foundations Associate

SELECTED TECHNICAL PROJECTS

Failed Login Detector & Threat Alerter (Flagship): Built a Python/SQLite pipeline that parses Linux SSH auth logs, detects brute-force and credential-stuffing patterns, assigns severity tiers, and auto-generates incident reports with firewall remediation commands.
github.com/VonMagombo/failed-login-detector

Enterprise SOC Detection & Triage Lab: Built a virtualized Splunk + Wazuh monitoring environment; authored SPL correlation searches and Wazuh detection rules mapped to MITRE ATT&CK technique IDs; documented host-isolation triage playbooks.

PCAP Traffic Analysis & Beacon Detection: Performed deep packet inspection on malicious captures to identify C2 beaconing and DNS tunneling, extracted indicators of compromise, and authored custom Snort IDS signatures for gateway alerting.
